# Argumentación en Prensa Cubana

Luis Ernesto Ibarra Vázquez[1], Luis Enrique Dalmau Coopat[2], and Adrián Hernández Pérez[3]

Universidad de La Habana

**Resumen** El proyecto se basa en el estudio de la argumentación en los periódicos cubanos. El objetivo principal es el análisis de las estructuras argumentativas que aparecen en ellos para conocer cuáles son las más usadas, cuáles son los argumentos expresados, entre otras estadísticas. En una primera etapa se concentrará en la segmentación y en la clasificación entre argumentos o no argumentos del texto, luego se clasificarán las cláusulas según el rol que jueguen y por último se observará la relación existente entre dichas cláusulas.

**Keywords:** First keyword · Second keyword · Another keyword.

## 1. First Section

### 1.1. A Subsection Sample

Please note that the first paragraph of a section or subsection is not indented. The first paragraph that follows a table, figure, equation etc. does not need an indent, either.

Subsequent paragraphs, however, are indented.

**Sample Heading (Third Level)** Only two levels of headings should be numbered. Lower level headings remain unnumbered; they are formatted as run-in headings.

*Sample Heading (Fourth Level)* The contribution should contain no more than four levels of headings. Table **??** gives a summary of all heading levels.

**Cuadro 1.** Table captions should be placed above the tables.

| Heading level | Example | Font size and style |
|---|---|---|
| Title (centered) | **Lecture Notes** | 14 point, bold |
| 1st-level heading | **1 Introduction** | 12 point, bold |
| 2nd-level heading | **2.1 Printing Area** | 10 point, bold |
| 3rd-level heading | **Run-in Heading in Bold.** Text follows | 10 point, bold |
| 4th-level heading | *Lowest Level Heading.* Text follows | 10 point, italic |

Displayed equations are centered and set on a separate line.

$$x + y = z \tag{1}$$

Please try to avoid rasterized images for line-art diagrams and schemas. Whenever possible, use vector graphics instead (see Fig. **??**).

**Figura 1.** A figure caption is always placed below the illustration. Please note that short captions are centered, while long ones are justified by the macro package automatically.

**Theorem 1.** *This is a sample theorem. The run-in heading is set in bold, while the following text appears in italics. Definitions, lemmas, propositions, and corollaries are styled the same way.*

*Demostración.* Proofs, examples, and remarks have the initial word in italics, while the following text appears in normal font.

For citations of references, we prefer the use of square brackets and consecutive numbers. Citations using labels or the author/year convention are also acceptable. The following bibliography provides a sample reference list with entries for journal articles [**?**], an LNCS chapter [**?**], a book [**?**], proceedings without editors [**?**], and a homepage [**?**]. Multiple citations are grouped [**?**,**?**,**?**], [**?**,**?**,**?**,**?**].
